## **EDUCATION FOR INNOVATION**

### *National Montessori Education Week*

If you are looking for an education that prepares your child to be successful in today's world, explore a series of special events Montessori schools, both private and public, are offering in your community.

Families in every State are invited to celebrate an educational methodology and curriculum that is on the cutting edge of today's school reform. Although Dr. Maria Montessori developed this child-centered, individualized pedagogy over 100 years ago, it has proven to be a comprehensive "aid to life" to children around the world. Montessori programs for infants, toddlers, early childhood, elementary, middle and high school equip our next generation not only with solid academics, but also strengthens social flexibility, emotional health, and self-confidence. Families are welcome to participate in this year's *Montessori Education Week*, an annual event designed to promote the development of adaptable skills and nurture an innovative mindset for all our children to fulfill their life's potential.
